## Interlibrary loan and document delivery service (PI/SOD)

- Home
- Loans
- URV card
- Regulations
- Borrowing documents
- Borrowing spaces
- Borrowing equipment
- Renewals
- Reservations
- My account

The aim of the interlibrary loan and document delivery service is to locate and supply all those documents that cannot be found at the URV's CRAI or at the consortium of Catalan universities.

If you wish to use this service, you must first register. For each request, you must fill out a form. Select the group to which you belong:

1. [URV Community](#) (CAT) (ESP): students, teaching and research staff, administrative and research staff, lubilo, Alumni, Friends of the URV and those persons carrying out research.
2. [Institutions external to the URV](#): Institutions that want to borrow documents from the URV CRAI's collection or use the Interlibrary loan and document delivery service.

The service has a cost.

# Access to University Digital Library (SABIDI)

La Comissió de Política Científica i de Transferència, delegada del Consell de Govern, va aprovar, en data 13 de desembre de 2017, unes noves [Directrius per a la signatura i filiació institucional](#) en la producció científica de la URV.

Per raons de seguretat, si us plau, tanqueu la sessió i el vostre navegador web quan hàgiu acabat d'accedir als serveis que requereixen autenticació.

# Research support service at the URV CRAI

# Research support service

<https://www.crai.urv.cat/en/services/researcher-support/>

# Regulation on Institutional affiliation

All URV staff and students must include **URV as their first affiliation** in scientific publications and dissemination outputs..

The name of the University that must appear in the signature is **Universitat Rovira i Virgili** (in Catalan), in the first place.

Other **university structures and units** may also be included: department, faculty, research group, research centre or research institute.

To indicate the country, the **English form "Spain"** must be used, to facilitate the international collaboration indicator..

Regulation on Institutional affiliation [in Catalan]

18th December 2025 Modification [in Catalan]

# Regulation on institutional affiliation

Regardless of the number of affiliation lines, URV must appear in first position, preferably on the first affiliation line.

# ORCID

Unique, digital and persistent **16-digit alphanumeric code** that identifies researchers and facilitates the recovery and dissemination of their production.

The ORCID ID is a requirement of the **Portal de la Recerca de Catalunya**, in order to apply for scholarships and funds.

**Create the ORCID ID by using our URV institutional e-mail address.**

**Use this identifier in all your academic works and mainly when contacting publishers.**

**Keep your ORCID profile updated with all your scientific production references.**

**Link the ORCID ID with your other digital profiles and digital identifiers (Researcher ID, Scopus Author Record, Google Scholar, etc.).**

### Digital identity of researchers

The **digital identity** of researchers is the identification and recognition of their scientific production in a digital context.

Taking care of it is important because it is the letter of presentation of the researcher's work and trajectory to the world and serves to differentiate him from other scientists.

In this context we distinguish between:

#### Identifiers of the researchers

Researchers' digital identifiers are **numerical or alphanumeric codes** that serve to uniquely identify the researcher. Associated with these codes we find information such as their studies, the jobs they have carried out, their publications, etc. For example the **ORCID**, the **Scopus Author Identifier** and the **Researcher ID**.

#### Researchers' profiles

Digital spaces that collect scientific production, the curriculum, etc. but **they do not assign a number** that uniquely identifies the researcher. For example the profile on **Google Scholar**, **Dialnet Plus** or the one provided by the **IRIS curriculum manager at the URV**.

**Identification**

# Reference managers

BELIEVE / CRAI guides and tutorials / Managers of bibliographic references / Introduction

## Managers of bibliographic references: Introduction

Search this guide Search

Introduction Mendeley EndNote Online Zotero Quick citation tools Bibliographic citation styles Spanish English

### Managers of bibliographic references

**Bibliographic managers** are tools that help manage the bibliographic references we consult in library catalogs, databases, magazines, websites...

Most bibliographic managers allow:

- Create a personal database (or library) of bibliographic references
- Collect bibliography automatically, organize and comment on it
- Organize, edit and search saved references
- Insert citations and create bibliographies easily and automatically in different citation styles.

Examples of bibliographic reference managers are: [Mendeley](#), [EndNote](#), [Zotero](#), [RefWorks](#), etc.

#### What is Mendeley?

**Mendeley** is a bibliographic reference manager that allows you to collect, store and manage bibliographic references, while allowing you to automatically cite and create bibliographies in different standard bibliographic citation styles.

Mendeley has been part of the Elsevier group since 2013.

Consult the guide to know more .

#### What is Zotero?

**Zotero** is a free bibliographic citation manager. It has a desktop version and a cloud application, which can be synchronized; in addition, it has an extension for different browsers (Chrome, Firefox, Safari...) that captures bibliographic information directly from the web.

**ZoteroBib**, created by the Zotero group itself, is a quick citation tool that allows you to make citations and bibliographies without having to register or log in. For more information, see the [ZoteroBib FAQ](#) section .

#### What is EndNote Online?

**EndNote Online** is an online reference manager accessible through Web of Science.

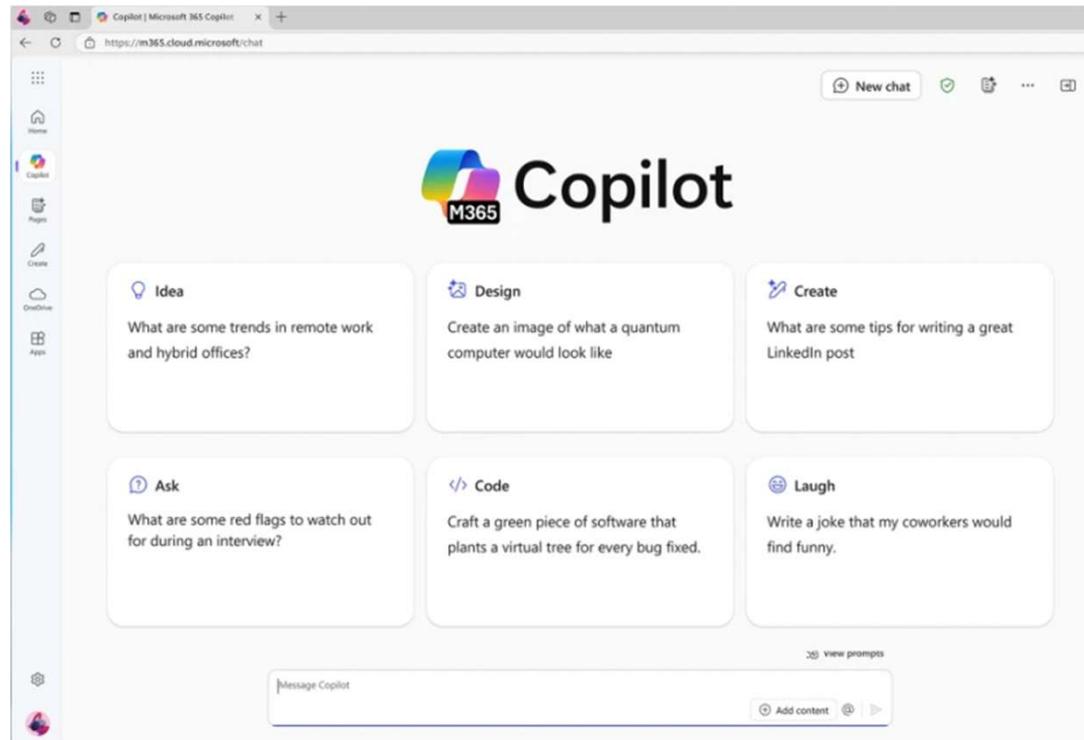

- The storage capacity is 10,000 references.
- It allows you to import references directly from databases and catalogs.
- Allows you to share references and create bibliographic lists.

# Artificial Intelligence

## Institutional Tools and Resources for Generative AI

**Microsoft Copilot Basic:** Generative AI tool available to the entire university community. This version is linked to the Office365 Campus license.

# Artificial Intelligence

**Web of Science Research Assistant**: Generative AI-powered tool to support researchers

**Web of Science™** Smart Search Advanced Search **Research Assistant** Sign In Register

**Accelerate Your Research with a Smart Assistant**  
Choose an agentic AI guide to help you advance your research goals

- Explore a topic**  
Explore topics, identify related subtopics, and visualize trends.
- Create a Literature Review**  
Synthesize the literature, uncover research gaps and hotspots, and formulate hypotheses.
- Find a Journal**  
Match your manuscript or topic to relevant, trusted journals.

**Have a research question?**

Ask a research question

Example questions:

- How does climate change impact biodiversity?
- Who are the most cited authors in genetics?

- **Smart discovery**  
Explore a topic with natural language
- **Task-based guidance**  
Create a Literature Review
- **Responsible AI**  
Its knowledge base is the Web of Science Core Collection.

# Responsible Use of AI in Research

An ethical and responsible use of AI is essential to ensure that your actions align with the URV regulatory framework.

## Good Practices in the Use of AI in Research

- Introduction
- Recommendations for researchers
- Main uses of AI in the research process
- Editorial policies related to AI
- Regulatory framework and bibliographic references

- Be responsible for the scientific output
- Use AI transparently
- Respect data privacy and confidentiality
- Respect authorship and intellectual property rights
- Comply with applicable laws and regulations
- Train in the responsible use of AI

Artificial intelligence (AI) provides tools that can improve efficiency in the research process and enhance productivity in tasks such as **literature review**, **data analysis**, and **writing**, among others. **Human oversight** is always necessary to ensure the **accuracy, reliability, and appropriateness** of the content. **Research integrity** must guide any application or use of AI, ensuring **respect for intellectual property, data protection**, and the safeguarding of scientific credibility.

# Don't miss the self-training courses for PHD Students

**I'm starting my doctorate: what do I need to know about information resources? And about the management of scientific production?**

Duration: **4 hours**. Registrations: Course in [Catalan](#), [Spanish](#) and [English](#)

**Publish in open access**

Duration: **4 hours**. Registrations: Course in [Catalan](#), [Spanish](#) and [English](#)

**Research data: open data repositories and data management plan**

Duration: **6 hours**. Registrations: Course in [Catalan](#), [Spanish](#) and [English](#)

[More information](#)

# Training: face-to-face, virtual and self-training

**PROFID courses:** the CRAI, in coordination with the Doctoral School and in collaboration with the Institute of Education Sciences (ICE), organizes courses aimed at doctoral students within the Transversal Training Program. Consult and manage registration through the [ICE website](#).

**More courses related to research production:** detailed information on other courses and webinars related to the management of scientific production [Training guide](#)
